Journal of the American Osteopathic Association
Index to Volumes 84 and 85

NOTE TO USERS: Previously, JAOA volumes covered August to August each year. However, to conform with standard library practice in which volumes match the calendar year, volume 84 covered September 1984 through December 1984. Volume 85 covered January 1985 through December 1985. Because two volumes are being indexed this time, some page numbers are duplicates. If an entry is not found under the first citation, simply check under the same page number in the other volume.

This index is divided into an AUTHOR INDEX and a SUBJECT INDEX. Monthly page numbers are continuous through each issue; they appear in the text in lightface. Items indexed from the reader sections are identified by volume page numbers which are continued from month to month; they appear in the text in boldface. Inclusive pagination for reader pages by month is as follows:

Pages	Month	Year
1-93	September	1984
94-156	September supplement	1984
157-236	October	1984
237-303	November	1984
304-382	December	1984
1-50	January	1985
51-122	February	1985
123-210	March	1985
211-273	April	1985
274-341	May	1985
342-402	June	1985
403-474	July	1985
475-544	August	1985
545-615	September	1985
616-689	October	1985
690-765	November	1985
766-854	December	1985

Included in the AUTHOR INDEX are entries arranged in alphabetical order for authors of original and special articles, and research abstracts. Also included are listings for authors of signed editorials, book reviews, letters, clinical notes, and case reports.

The SUBJECT INDEX includes entries for all original and special articles, editorials, clinical notes, letter section, case reports, and research abstracts.

Editorial titles are listed alphabetically by title under the heading EDITORIALS.

MEDI-NOTES includes entries by month, with subjects and pagination.

Entries for book reviews and book notices (identified by "R" and "N") follow all other entries under the letter "B."

Author Index

Included in the author index are entries arranged in alphabetical order for authors of original articles identified by an asterisk (*). Articles in clinical notes are identified by the letters "CN," letters by the letter "L," special articles by the letters "SA," case reports by the letters "CR," personal perspectives by the letters "PP," osteopathic education by the letters "OE," and research abstracts by the letter "RES." Also included are listings for authors of signed editorials, identified by the letter "E," and book reviews "BR."
